My Dear Friends,

Wish you all a Very Happy and Prosperous New Year.

The new year brings Happy tidings with it. I am pleased to share that our performance in the last quarter was good. As compared to Q3 of FY 18, we have grown by 23.7% in Q3 of FY19. While the Indian Automotive industry has grown at a rate of 10.9% in the nine months till Dec'18, we have grown by 20%. Congratulations! To all involved in making this possible. We now need to sustain this momentum.

I would also like to welcome our new family member Kwangsung Corporation limited. Recently we signed a joint Venture agreement with them for manufacturing and selling, inter-alia, interior and exterior parts, plastic moulded parts and accessories for the passenger and utility vehicles segment in a phased manner.

The business potential is looking good moving ahead. CFD pune has undertaken a substantial extension of shed area to cater to increase in business relations with Tata Hitachi, Kobelco and JCB. They have also started developing the proto of a new cabin for Case new Holland. Mag engineering has completed the VOLVO D5 cabin prototype which has been appreciated for its quality by Indian and Global VOLVO teams. Sandhar-Amkin will undertake test marketing for its range of helmets in February and will launch the product formally in beginning of new fiscal. The investments that we had made in the past few years should now start to bear fruits.

What is particularly satisfying, is the fact that the Sandhar family is also conscious of its responsibility towards society, environment and fellow members. As such there is great emphasis on Tree plantations, cleanliness drives, regular trainings and health checkup camps to ensure growth motivation and better life for everyone.

I take this opportunity to thank all our customers and suppliers for their support.

Warm Regards,
Jayant Davar

Sandhar Components, Manesar

Sandhar Components, Manesar spread over 8100 sq. meter area, is situated in Sector-3, IMT, Manesar, Gurugram. The unit was established in 2001 and manufactures **Zinc Die Casting & Press Parts** for the Auto and Non-Auto sectors.

It is an IATF 16949, ISO 14001 & OHSAS 18001 certified unit & caters to various renowned customers like Forza Medi, HI-LEX, Krishna Ishizaki, Brose & Webasto to mention a few.

The manufacturing facility is equipped with latest machines and also has well equipped Tool Room for making & repairing Tools & Dies.

The unit has 23 High Pressure Die Casting Machines ranging from 40 Tons to 125 Tons; one Techmire HPDC machine for high precision small components. It mainly processes Zamak-3 & Zamak-5 on HPDC machines. Apart from this they use CNC Turning machine & SPMs for Post Die Casting operations. For making Non-Ferrous stamping parts the unit has 5 Presses with capacity of 25 Tons to 63 Tons.

Zinc Die Casting

Press Shop

Some products manufactured at Sandhar components, Manesar are as under:

Zinc Die Casting Parts with Surface Treatment

Painted Zinc Parts

Ni Chrome Plated Zinc Parts

Powder Coated Zinc Parts

Zinc Die Casting

Inner Cylinder for 2W & 4W Locks

Steering Lock Body for 2W & 4W Locks

Press Parts

Contact Plates

Key Blanks

Tool Room

The in-house tool room allows the unit to save valuable time in case of any tooling related requirement. Apart from the conventional machines they have crucial & precise Tool Room machines like CNC Wire Cut, VMC, EDM, Vision measuring machine (VMS) for inspection.

Tool Room Machine

Wire Cut Machine

CNC Turning Machine

Broaching Fixture

QA Lab Facilities

Sandhar Components, Manesar has a Standard Room to test and improve the product quality and performance. It also has the facility for carrying out calibration of gauges and measuring instruments internally.

Improvement Initiatives

In order to meet the needs of the changing market scenario, the unit has started some constructive initiatives like ZED (Zero Effect Zero Defect). The two year program through CII is going to complete in June, 2019. Under the program all employees have been trained to use their five senses in day to day activities to closely monitor the manufacturing process to eliminate causes of defects in the production area. A WAR Room has also been set up to discuss the daily issues related to ZED.

War Room

Training Room – for Associates

Another initiative is the implementation of 100% PLM software in the unit. Through this software each & every project can be monitored online.

A dedicated workforce of around 275 people works with a vision in mind to provide 100% customer satisfaction. To boost the morale of employees there are lots of employee engagement activities like Birthday Celebrations, Best Kaizen Awards, Participation in Quality Circles, Monthly award for Best Zone Leaders/ Operators & Roll over Trophies for Best 5'S Zone of the month. It has recently opened a small recreation center where employees can enjoy Table Tennis, Carom, Badminton etc. The unit has an in-house canteen for providing hygienic & quality food for its employees.
